Vision

A global collaboration to
harness the power of data
for better lives

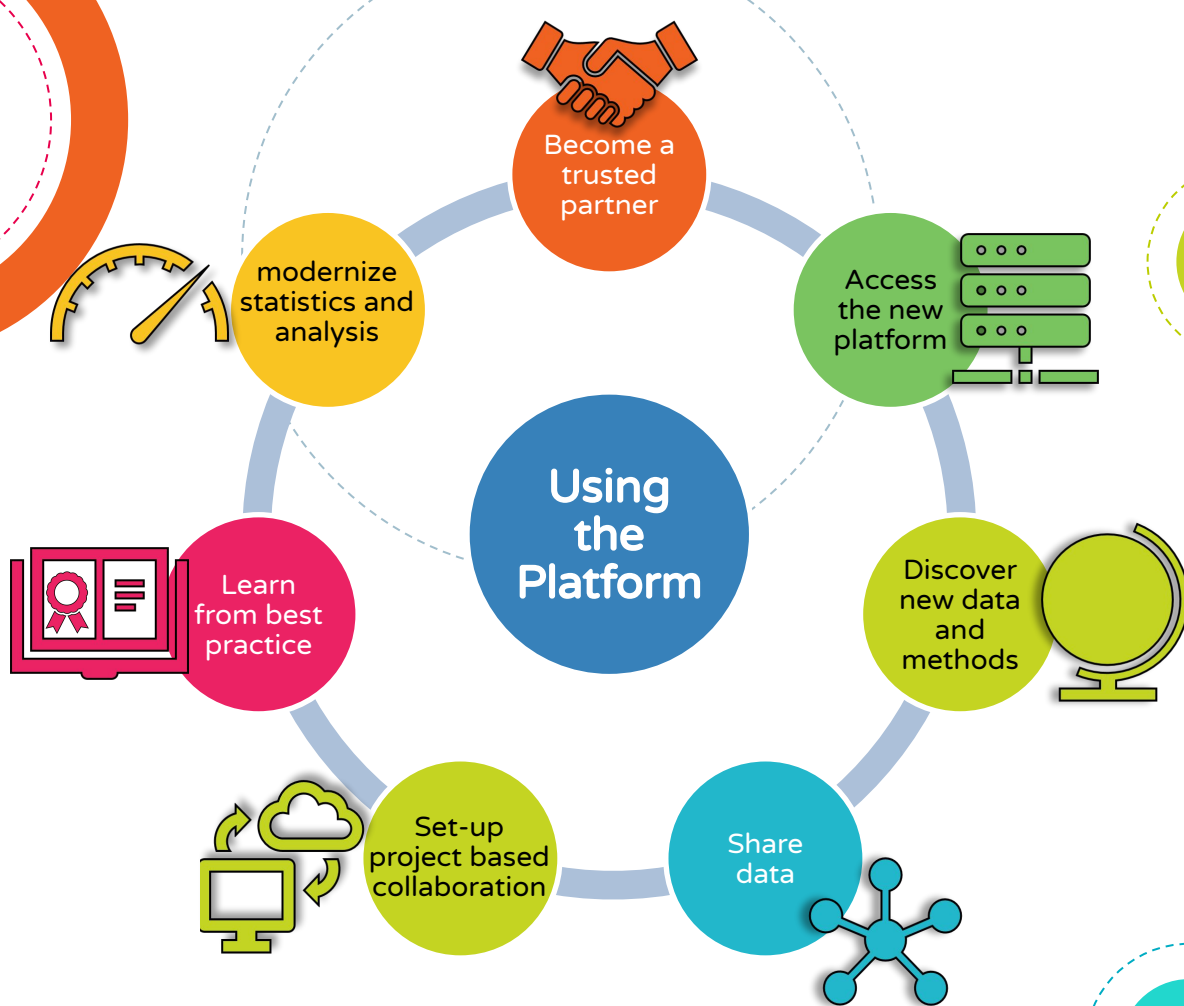

UN GWG (Big) Data Membership

Australia; Bangladesh; Brazil;
Cameroon; **Canada; China;**
Colombia; **Denmark;** Egypt;
Germany; Indonesia; Ireland; Italy;
Mexico; Morocco; **Poland;**
Netherlands; Oman; Pakistan;
Philippines; Republic of Korea;
Rwanda; Saudi Arabia;
Switzerland; **United Arab Emirates;**
United Kingdom; United Republic
of Tanzania; United States of
America

United Nations Statistics Division,
United Nations Economic Commission
for Africa , Nations Economic and
Social Commission for Asia and the
Pacific, United Nations Economic
Commission for Europe, United
Nations Statistical Institute for Asia
and the Pacific, United Nations Global
Pulse, International
Telecommunication Union, Universal
Postal Union, African Development
Bank; CARICOM, GCCSTAT,
Eurostat/European Commission,
International Monetary Fund, OECD,
World Bank

Approach

- ◎ Hacker, Hipster and Hustler
- ◎ Minimal Viable Team
- ◎ Minimal Viable Platform

#UNGlobalPlatform

Principles

- ◎ Configure / Show / Iterate
- ◎ Multi Cloud (Geopolitical/Security)
- ◎ Multi Account (Isolation)
- ◎ Consumption Based Pricing
- ◎ Commodity Infrastructure
- ◎ Agile Delivery
- ◎ Working with users
- ◎ Prototyping
- ◎ Iterative Development

Leave no one behind

Endeavour to reach
the furthest behind
first

Platform Business Model

Platform Business Model

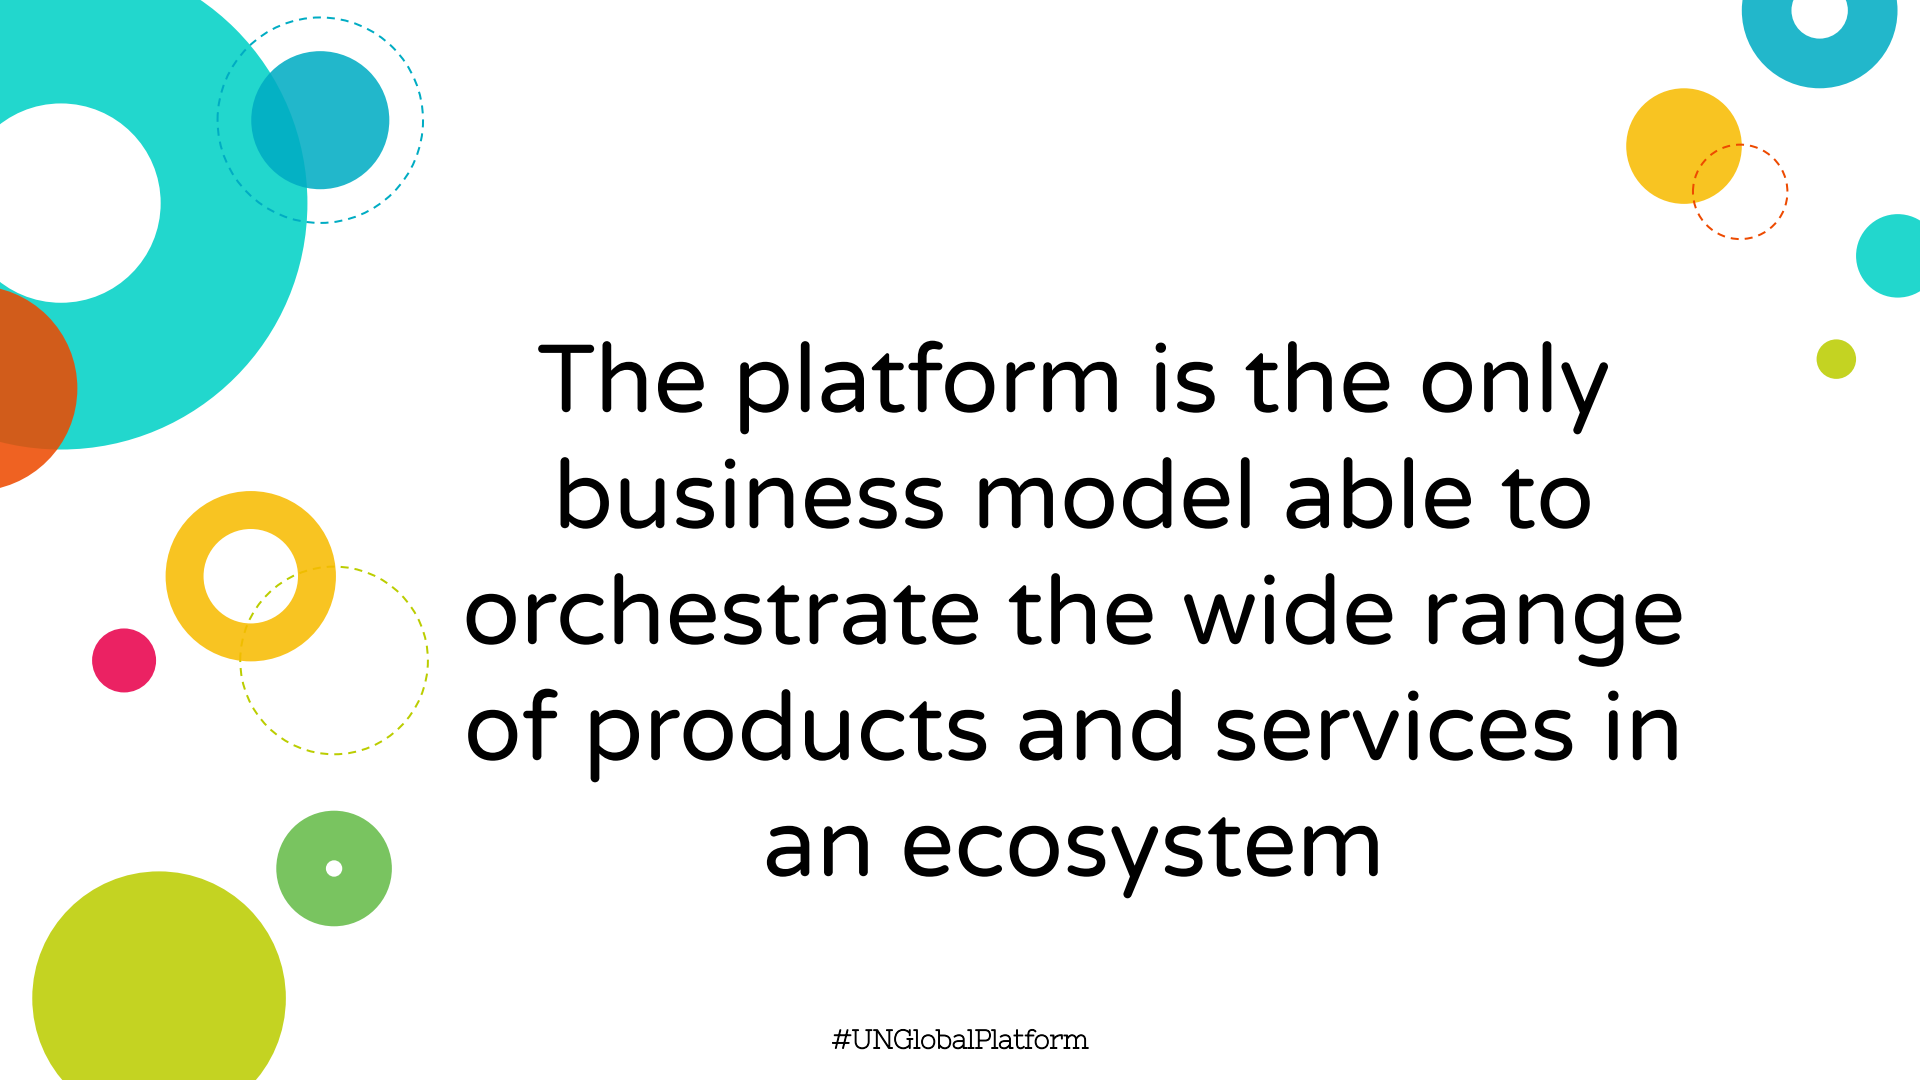

- ◎ A means of connection
- ◎ Orchestrates an ecosystem
- ◎ Utilises the network effect
- ◎ Aggregates supply and demand
- ◎ Remove frictions
- ◎ Can have more than one type of value exchange going on

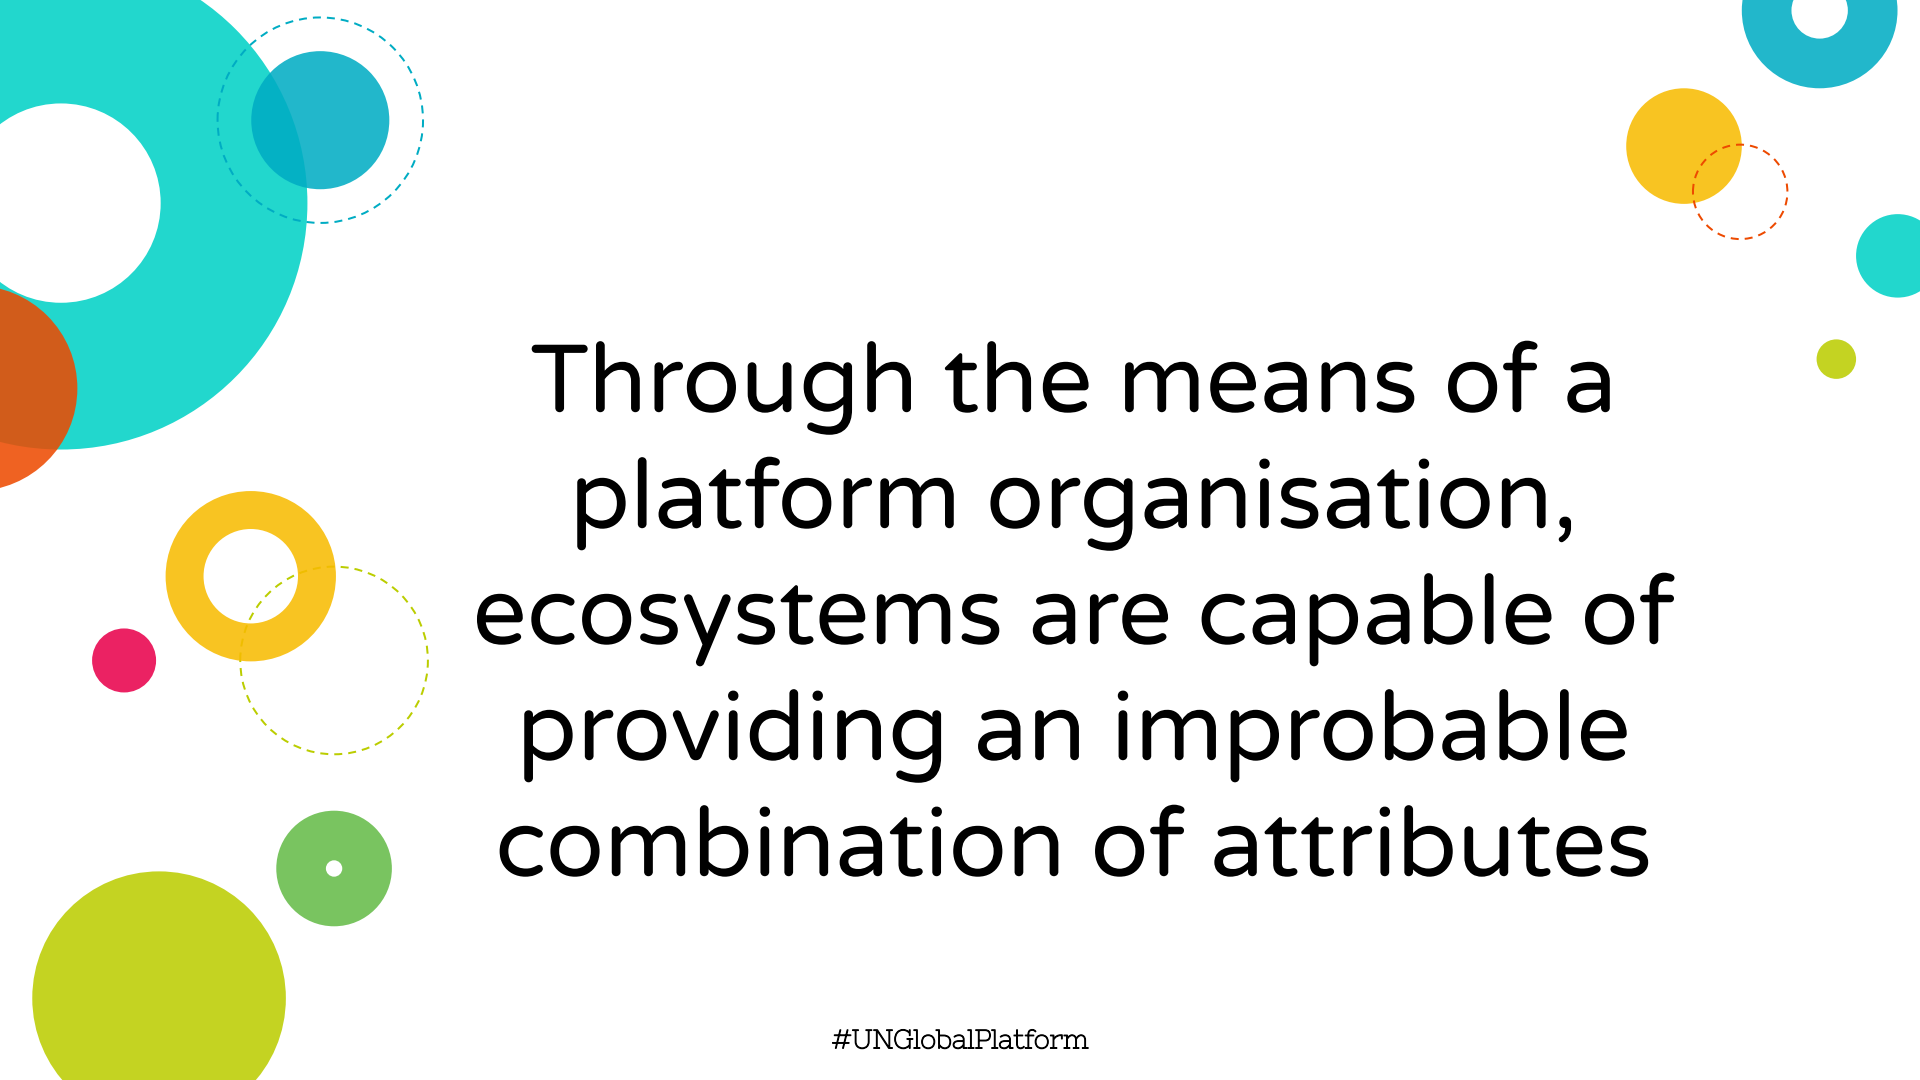

Six distinct aspects of a platform and its ecosystem

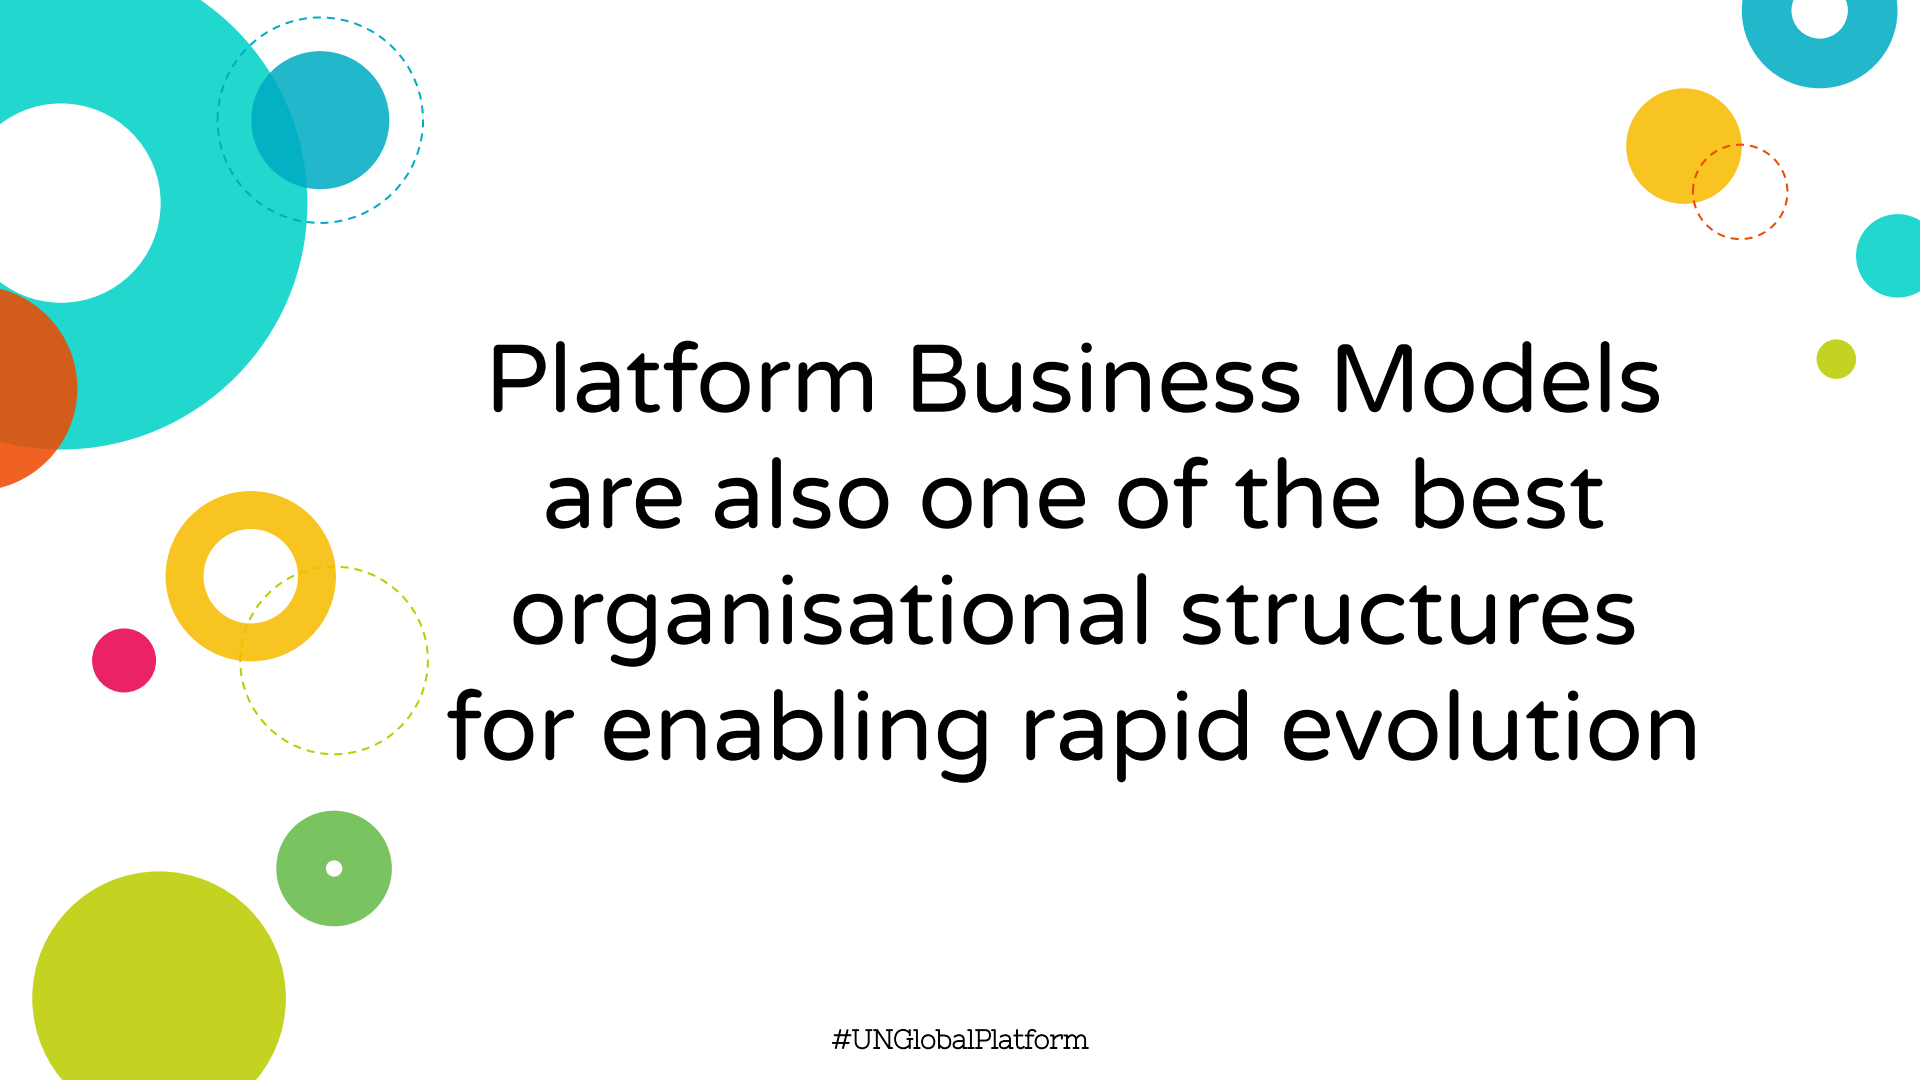

- ◎ Attract/filter/match mechanisms
 - ◎ Guaranteed transaction quality
 - ◎ Building blocks
 - ◎ Information quality/availability
 - ◎ The platform design pattern
 - ◎ Dynamic customer experiences
-
- ◎ Platform Design [Toolkit](#)

The platform is the only
business model able to
orchestrate the wide range
of products and services in
an ecosystem

Through the means of a
platform organisation,
ecosystems are capable of
providing an improbable
combination of attributes

Platform Business Models
are also one of the best
organisational structures
for enabling rapid evolution

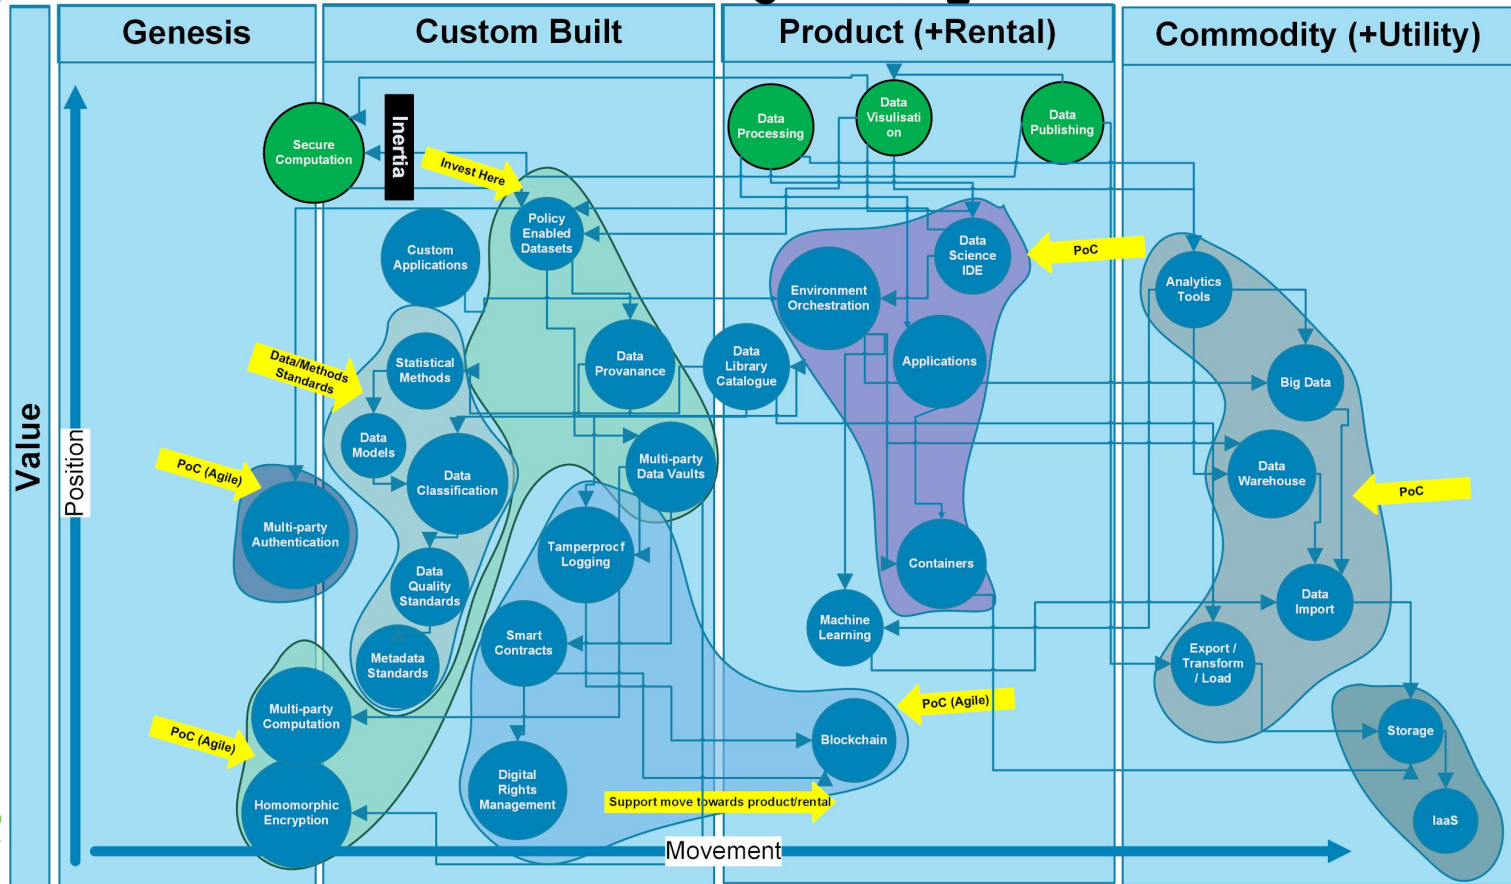

Technology Strategy

Global Billing Intelligence

Global Billing Intelligence

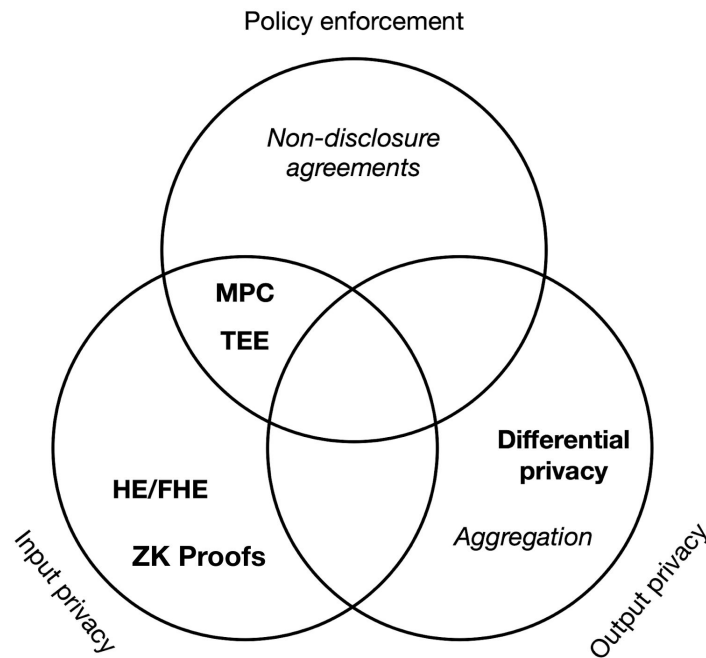

Global Billing Intelligence

- ◎ Billing Data Aggregation
- ◎ Intelligent Analytics
- ◎ Rules
 - USA cheaper than Germany
 - Turn stuff off!
- ◎ Manage Budgets
 - Per Task Team, Partner, Program

Privacy Preserving Techniques Handbook

Cryptographic Techniques

- ◎ Multi-party Computation
- ◎ Fully Homomorphic Encryption
- ◎ Zero Knowledge Proofs
- ◎ Trusted Execution Environments
- ◎ Differential Privacy

Global Big Datasets

'It's not big unless it has a billion in it'

Big Data

- © Mostly created and owned by someone else. We don't own the data
- © Challenges of **access** to big data (data gravity)
- © Assumption: Big Data will be hosted in the cloud
- © Data mesh architecture

A decorative background featuring various colored circles (green, blue, orange, yellow, pink) and a large dashed light-blue circle that frames the central text. A teal ring is positioned at the top center.

“

“Cloud is now the default platform for managing data. On-premises is the past, and *only* legacy compatibility or *special* requirements should keep you there”

[Gartner](#)

A decorative graphic featuring a large, faint dashed circle in the background. Various colored circles (blue, green, yellow, orange, red, pink) are scattered around the perimeter, some solid and some dashed. The number '3' is centered at the top.

Global Big Datasets

100,000,000,000+

ADS-B Records

40,000,000+

AIS Records / Day

#UNGlobaPlatform

Automatic Identification System (AIS)

- ◎ 40 Million Records / Day
- ◎ Ship Position / Movement
- ◎ Analysis via
 - ◎ Methods Service
 - ◎ Location Analytics Service
 - ◎ Jupyter Notebooks
 - ◎ APIs

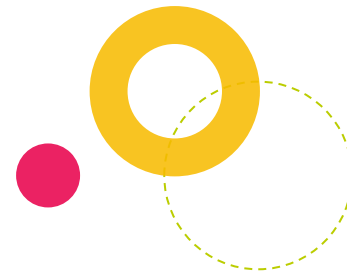

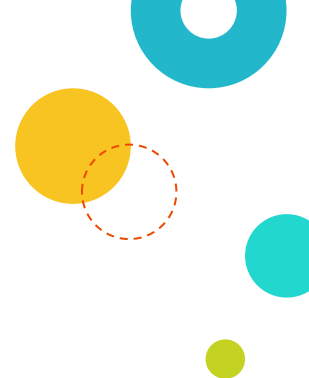

Automatic Dependent Surveillance (ADS-B)

- ◎ 600,000,000+ Records / Day
- ◎ Aircraft Position / Movement
- ◎ 100 Billion Records
- ◎ Analysis via
 - ◎ Methods Service
 - ◎ Location Analytics Service
 - ◎ Jupyter Notebooks
 - ◎ APIs

Satellite Imagery

- ◎ Open Data
 - Landsat
 - Sentinel
 - ◎ Commercial
 - Planet
 - 3.0m Resolution
 - 0.7m Resolution
- 
- 

Satellite Imagery

- ◎ Cloud Native Geoprocessing
- ◎ Look at Geo Intelligence Market
